

Kick up the face volume and look fantastic! This color combination goes with every uniform or costume.

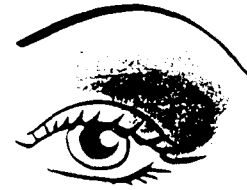

Step 1 Prep Time.

Every artist knows before you paint a masterpiece, first prep the canvas, your skin! Good skin care helps your make-up look last, keeps skin smooth, and prevents breakouts. Start by cleansing with an antibacterial face cleansing lotion and toner. Use a face moisturizer that's oil-free as perspiration increases oil production. Products with salicylic acid keep away dead skin flakes that can clog pores. Perfect choice: our Blemish Control natural skin care line does it all.

Step 2 The Eyes Have It.

Apply eye make-up first for easy under eye clean up from shadow that's fallen under eyes after application. This keeps your looks fresh for hours. 1st begin by setting lid with oil-free loose face powder so shadow will go on smooth and won't blotch or crease. 2nd define eyes with a deep brown matte shadow in outer eye corner, blending slightly above eye crease (for lift) finishing 1/2 way in across lid. 3rd apply a flush color like terra-cotta matte shadow above eye crease 1/2 way in across eye bone. This color balances eyes to cheeks to lips and creates warmth to the face. 4th highlight eyes with shimmer cream color

shadow under brows and across inner eyelid. Use gold for darker skin. 5th line 1/2 way across lower lashes with brown liner and extend line slightly at outer corner. Apply black liner 1/2 way across lid extending up passed eye crease at outer corner. Do not meet these lines. Open eyes using White Eye pencil in between the two lines and on lower eye ridge.

Tip: Try eyeliner Sealer to keep your line from running. Extend, shape, and define brows first to create a frame for the eyes. Blondes choose color 1/2 shade darker than hair color. Brunettes choose color 1/2 shade lighter than hair color. More on brows and eye steps at modedion.com Perfect choice:

Performance Browns shadow collection, Eye Liner Sealer, White Eye pencil, and Pro Brow kit.

White Eye Pencil Here
(in between liners)

Step 3 Smooth Moves for Flawless Skin.

1st Apply oil-free liquid foundation where needed to even out skin. Cover dark under eye circles with a concealer and any blemishes with a blemish cover-up. Never use concealer on blemishes as most contain oil and another blemish will pop up next to the one you're covering. Set with oil-free loose powder. **Tip:** Blemishes can occur with perspiration and bacteria. Watch for bacteria and wash sponges, brushes and powder puffs regularly. Perfect choice: our Professional toned oil-free foundations, powders and concealers.

Step 4 Give Us Some Lip!

Red tones were the colors most requested by judges. Red can be over powering when not applied correctly. 1st line lips turning head slightly to the side and focusing on widening the sides of the mouth. Use a red/brown lip liner to deepen and pull in the edges filling in onto lips. Now apply red tone lipstick. The bright lipstick pulls lips out! Create pop to lips by applying a shimmering gold or silvery gloss at the center of upper and lower lips. **Tip:** Perfect choice: Stage Red lipstick for large stages and soft, sheer Rhubarb for small stages. Lip liner in Sienna and Nugget or Avalanche for pop.

Step 5 Get Cheeky.

Avoid red stripes for cheeks by using the correct shade for the right job. Flush cheeks with sheer red cheek color, focus on the rounds (smile to find these) blending up slightly onto cheek bone. Contour cheekbones using a neutral pink/brown cheek shade. Start at the center of your ear blending along the cheekbone towards the base of your nose. **Tip:** Tap excess cheek color off brush to avoid applying too much. Applying cheek color last prevents over application. Perfect choices: Stage Red and Contour cheek colors.
